Dynamic Technology Consultant and certified Project Management professional with over 6 years of experience leading large-scale digital transformation and public sector advisory programs. Expert in aligning AI-driven innovations and advanced analytics with strategic governance goals to enhance systemic efficiency. Spearheading large-scale PMU operations and technical roadmaps for high-priority initiatives. Adept at navigating complex stakeholder environments to translate strategic policy into production-ready digital solutions. Highly proficient in data modeling and predictive analytics, with a specialized focus on driving operational transparency through evidence-based research, strategic documentation, and process standardization.

Profile Summary

- Developed an open source KAG – based policy assistant leveraging Internal Audit Wing (IAW) guidelines and GFR rules and implemented a multi-agent orchestration workflow to analyze audit reports, generate summaries, and provide actionable recommendations aligned with IAW policies.
- Engineered a production-ready, NLP-based Internal Audit assistant utilizing a RAG hybrid lookup-LLM architecture (Flask, spaCy, Ollama) to achieve 90% accuracy via direct rule extraction and vector similarity search.
- Deployed a privacy-focused, offline-capable framework featuring REST API support and embeddable widgets, ensuring secure document Q&A and seamless integration across internal government modules.
- Led digital transformation program for the Ministry of Finance (CGA), including development of proof-of-concepts (POCs) and technical documentation for AI/ML chatbot (Rule based, fraud analytics, and OCR implementations within PFMS modules aligning technology delivery with fiscal governance goals.
- Formulated strategy and transformation roadmap for GIFMIS modernization, integrating platform engineering principles and IMF's Public Financial Management (PFM) guidelines to enhance financial system efficiency and interoperability.
- Architected a data transition framework to migrate over 170+ SFTP/XML-based integrations to RESTful JSON APIs, enabling real-time interoperability between RBI, banks, payment gateways, and external systems.
- Conceptualized and designed AI/ML-based Scheme analytics platform including data source pipeline integration, high-level system architecture, and analytics layer for predictive scheme monitoring.
- Directed PMU operations for the Ministry of Home Affairs (MHA) under the Quality Council of India, co-leading a 70-member consulting team to deliver dashboards, data systems, and SOPs that improved decision making and operational transparency.
- Performed strategic policy and market research across sectors such as Medical Value Tourism, Pharma, Infrastructure, and Rural Development, conducting international benchmarking and KPI framework development to inform national strategy formulation.
- Strengthened governance and risk management mechanisms in Government e-Marketplace (GeM) by detecting vendor fraud patterns, performing due diligence, and recommending incident management policies based on data-driven insights.
- Delivered cross-functional stakeholder management and advisory across ministries and development agencies including MOF - CGA, MHA, MoHUA, GEM GIZ and GMDA to align business objectives with policy and technology execution.
- Demonstrated hands-on technical acumen in Python, SQL, Tableau, and data modeling, supporting analytical strategy development, dashboard creation, and business case evaluation.
- Authored multiple strategic and technical documents, including FRDs, BRDs, RFPs, tender responses, SOPs, and digital transformation roadmaps contributing to business development, client delivery excellence, and institutional knowledge building.

WORK EXPERIENCE

KPMG Advisory Services Pvt. Ltd

Oct 2024 – Present

Senior Consultant (G&PS - Digital Government Advisory)

PMU – Ministry of Finance (CGA)

- Engineered an open-source, multi-agent platform featuring a KAG-based policy assistant for regulatory guidance and an automated audit reviewer that generates actionable, IAW- and GFR-compliant analysis.
- Engineered an NLP-based Bharatkosh AI assistant, Internal Audit Wing chatbot IAW - assistant with hybrid lookup-LLM architecture using Flask, spaCy, and Ollama, achieving 90% accuracy through direct rule extraction and vector similarity search.
- Directed the preparation of proof-of-concepts (POCs) and comprehensive technical documentation for fraud analytics and automated document processing within PFMS modules, including Bharatkosh and E-Bill.

- Created a production-ready chatbot with embeddable widget support, REST API, and local LLM integration for privacy-focused, offline-capable document Q&A.
- Prepared POC and technical documentation for module wise chatbots, fraud analytics and OCR implementations to PFMS modules Bharatkosh and E-Bill.
- Prepared strategy and approach to transform GIFMIS based on platform engineering and IMF PFM guidelines.
- Assisted client in developing internal dashboards for multiple modules within the PFMS.
- Prepared POC and design document for AI/ML based scheme analytics application for PFMS including data source pipeline integration through external APIs, high-level architecture design.
- Prepared detailed technical documentation for transitioning PFMS module wise data sharing from SFTP based XML to JSON-based RESTFUL API (170+ APIs) integration with RBI, Banks, Payment Gateway Aggregators and External systems.
- Analysed FY 2024 Prakalpa data and identified data reconciliation mismatch between RBI and ZAO records.
- Audited and Assessed performance of 8 MHA PAOs to identify user-level (Pr.AOs, AAO, PAOs, DDOs, DH) challenges in E-bill module.
- Managing client interactions and addressing technical challenges related to the ICEGATE and GST Refunds modules.
- Supporting business development activities, including RFP and tender preparation.

Quality Council of India (QCI). New Delhi

Oct 2021 – Sep 2024

Associate Manager

Jul 2023 – Sep 2024

Strategy and Policy Division

- Market research and policy gap analysis of sectors – Medical value tourism, Rural development, Infrastructure.
- Conducted in-depth secondary research and data-driven analysis of India's Medical Value Tourism (MVT) sector by identifying and benchmarking global key performance indicators (KPIs).
- Mapped and evaluated international best practices in medical tourism sector to derive insights for enhancing India's competitiveness.
- Feature identification to predict onboarding of manufacturers in Make in India scheme using RFM technique.
- Drafted a framework and developing KPIs for holistic development of rural areas.
- Concept ideation and framework design to establish a National Infrastructure Auditing and Monitoring portal.
- Worked on policy gap analysis and explored global best practices in quality infrastructure and structural health assessments.

Project Planning and Implementation Division – PPID

PMU – Ministry of Home Affairs

Jul 2023 – Feb 2024

- Oversaw data cleaning and analysis, ensuring data integrity and actionable insights.
- Designed and implemented dashboards and daily reports for the client, facilitating informed decision-making and project tracking.
- Conducted extensive stakeholder management, liaising with senior bureaucrats of the GOI.
- Managed the entire project lifecycle, from team hiring to completion of deliverables, ensuring effective execution and alignment with project goals.
- Led a team of 12 consultants and co-led a team of 70 consultants on a high-priority, confidential Government of India (GOI) project.
- Provided project recommendations and prepared SOPs for data cleaning, analyzing, and storing data.

GeM PMU – Government E Marketplace (Ministry of Commerce and Industry)

Apr 2022 - Jun 2023

- Managed a team of 14 to execute high-stakes GeM portal onboarding for vendors and service providers, implemented standardized SOPs and due diligence frameworks to validate tender completion across state and central government departments.
- Engineered data-driven fraud detection protocols to identify anomalous vendor behaviors, drafted and presented incident management policies to stakeholders to mitigate risks associated with fraudulent certifications and historical data discrepancies.
- Developed OCR-based prototypes and data-processing pipelines to detect anomalous behaviors and suspicious transaction trails within the GeM portal, optimizing audit efficiency by 90%

Junior Associate

Oct 2021 - Mar 2022

- Optimized the end-to-end onboarding lifecycle for **260+** service categories on the **GeM portal**; performed high-frequency data auditing and reporting to ensure data integrity and track service providers and vendors growth for senior stakeholders.

German Development Agency (GIZ – India), New Delhi

Feb 2021- Aug 2021

Project Intern – Analytics

- Leveraged **QGIS** to analyze spatial datasets for 7 AMRUT city masterplans; converted complex data into actionable urban policy frameworks.
- Developed a MoHUA interactive dashboard to perform **gap analysis** on town-planner vacancies and existing

cadre, enabling ULBs to execute **strategic workforce modeling** for future infrastructure demands.

SG Analytics – Pune

Aug 2020 - Nov 2020

ESG Consultant

- Executed end-to-end research and analysis on ESG performance for 14 cross-sector global entities, identifying key risks and opportunities in their environmental and social governance.
- Streamlined data collection for over **450+ performance indicators**; audited company processes and stakeholder commitments to ensure 100% compliance with **GRI reporting requirements**.

Safetipin - Gurugram

Jan 2020 - May 2020

Research and Analytics Intern

- Spearheaded the end-to-end development of a new safety audit vertical; designed the core methodology and successfully integrated custom survey frameworks into the **Safetipin app** for real-time data capture.
- Transformed raw audit data into high-impact visualizations and policy recommendations for Pune City; successfully translated complex quantitative datasets into strategic safety improvements for government stakeholders.

Gurugram Metropolitan Development Authority (GMDA) – Gurugram

Jun 2019 - Aug 2019

Research Intern

- Conducted a comprehensive gap analysis of social infrastructure for **GMDA**, delivering data-driven policy solutions aligned with **URDPFI guidelines** to optimize urban planning and resource allocation.
- Executed advanced spatial modeling of using **ArcGIS**; translated complex geospatial data into actionable site-selection and policy recommendations for regional development.

Aarush Startup – Visakhapatnam

Jan 2018 – Jun 2018

R & D Executive (Product Manager)

- Spearheaded a multi-sector startup consortium (IT, Health, Solar) to pitch and secure "Cluster Village Development" initiatives with the Govt. of AP; delivered critical waste-management policy frameworks to global stakeholders including UKAID and UNDP.
- Led a team of 8 to transform **Aarushlife.com** from concept to investor-ready MVP; designed the business model and high-fidelity demo used for investor buy-in.

EDUCATION

Texas McCombs School of Business

2023 - 2024

- Post Graduate Program in Data Science and Business Analytics
- Capstone Project – Banking credit card - Predictive analytics for credit risk management
- Eportfolio - <https://eportfolio.mygreatlearning.com/manohar-sattaru>

TERI School of Advanced Studies, New Delhi

2018 - 2020

- M.Tech in Urban development and Management

Aditya Institute of Technology and Management, Srikakulam

2013 – 2017

- B. Tech in Mechanical Engineering

SKILL SET

- | | |
|--|--------------------------------------|
| - Python, Flask, Gradio, Hugging face | - Technology and Strategy consulting |
| - EDA, SQL, Tableau, and Power BI | - Stakeholder Management |
| - GEN AI Chatbots | - Business and Risk analytics |
| - AI/ML use cases and its applications O/S | - Policy Advocacy and Communication |
